A photograph of a modern two-story house at dusk. The house features a mix of materials: dark grey brick on the lower left, light-colored stucco on the upper left and right, and horizontal wood slats on a central upper section. Large windows and a glass-fronted entrance are visible, with interior lights glowing. A teal-colored geometric overlay, consisting of a large triangle and a smaller rectangle, is positioned in the lower-left foreground. White text is superimposed on the teal area.

Australian made,
Steel-Line has
been delivering
garage door
solutions to
Australian families
for more than
35 years.

It's not just a garage door

Did you know that a garage door dominates about 30% of the front façade of most homes?

It is a fact that a stylish garage door can improve a potential buyer's first impression and a home's resale value.

Slimline sectional garage door in Colorbond® Surfmist®

Front cover: Slimline sectional garage door in DecoWood® Western Red Cedar

Back cover: Inspirations garage door with face fixed aluminium composite panels in Metallic Silver

A photograph of a modern, two-story house at dusk. The house features a prominent white rectangular structure with a dark-framed window and a dark-framed door. A large, teal-colored triangular graphic is overlaid on the right side of the image, partially obscuring the house. The sky is a mix of purple, pink, and blue, indicating sunset or sunrise. In the foreground, there is a green lawn, some small plants, and a large, light-colored concrete pot with a plant inside. The overall aesthetic is clean and modern.

INSPIRATIONS

Inspirations garage door with aluminium frame in Colorbond® Night Sky® and acrylic Opal Gloss inserts

The Inspirations range is a stunning range of stylish FingerProof™ aluminium framed garage doors with a wide selection of composite inserts for you to match with your home.

You simply look at the façade of the building and decide what style would best suit - choose your frame in a Colorbond® or a Dulux powder coat colour and then match it with the insert that best fits with the look you want.

Steel-Line offers a stunning range of stylish FingerProof™ aluminium framed garage doors with a wide selection of composite inserts or any compatible custom material you may choose to match with your design. Create the look that you want to customise the building to suit the surroundings.

 For Colour options refer to the colour range page.

FingerProof™ Safety Design

Is safety a concern for you? Ask about our standard FingerProof™ safety feature.

Thousands of injuries occur every year from garage doors. Steel-Line's FingerProof™ safety feature is an award winning design in the Best New Building Product category of Queensland Master Builders Association. Each panel's specially designed curved edges protect fingers from becoming trapped in the folding sections of the doors as they open or close. This panel joint not only safeguards your family against injury, it also seals out the weather that can penetrate conventional garage doors.

The face fixed design is laying the aluminium composite panels over the frame for that architectural look. The aluminium composite panels are the premier choice for an exterior cladding that will maximize the beauty of the structure while providing a sustainable product to prolong the life of the building.

Despite being conveniently lightweight, these aluminium composite panels certainly aren't pushovers. They have impressive durability and strength, which makes them well suited to bearing the tough conditions of the Australian climate. They are also vibration-absorbent, which will assist to reduce the noise in your garage.

 For Colour options refer to the colour range page.

NOTE: The face fixed Inspirations garage door does not have the FingerProof™ safety feature.

SAVANNAH

Glacier Savannah sectional garage door in Colorbond® Surfmist®

Stylish, strong and durable. Steel-Line's innovative Savannah range delivers a smooth finish in a wide range of customised door designs. The Savannah is made from BlueScope® Steel G300 coil delivering a far smoother and virtually blemish and shadow free finish compared to our competitors' smooth finish garage doors, which are made from softer G2NS steel.

A small additional investment for a heavier grade garage door.

Shadowing or oil canning can be defined as a perceived waviness in the flat areas of metal panels. Oil canning is an inherent part of light gauge cold formed metal products, particularly those with broad flat areas such as garage doors. Most manufacturers warn against shadowing or obvious oil canning and will not cover in warranty provisions. By using 0.7mm G300 steel, which is a stronger grade of steel than traditional steel used for garage doors, it minimises visual oil canning.

For Colour options refer to the colour range page.

**A SMALL ADDITIONAL
INVESTMENT FOR
HEAVIER GRADE DOOR**

Flatline sectional garage door in Colorbond® Metallic RHEA™

The Colorbond® Metallic colour range features innovative new paint technology which revolutionises the metallic lustre.

The new innovative paint type and production method strategically places particles in the paint system to optimise light penetration and colour reflectivity to increase brilliance. A simple play of light is all that's needed to bring out the signature metallic finish on the Colorbond® Metallic steel garage door.

The Colorbond® Metallic steel substrate is protected by Activate™ technology and AS/NZS 2728 compliance. It is also tried and tested in Australia.

The distinctive reflective surface of the Colorbond® Metallic garage door draws on the environment and surrounding structure, enabling you to enhance your home with subtle yet dramatic effects, endless nuances and dynamic changeable qualities.

As light gently washes over the mica particles in the metallic finish, a unique perception of depth is achieved. In addition, the mica particles create a striking effect as the appearance of the painted surface changes depending upon the lighting condition and viewing angle.

Whether it's by using the various design, creating distinctive architectural features, or even regulating the conditions of incidental lighting, the flexible nature of Colorbond® Metallic steel will complement and enhance any garage door design.

For Colour options refer to the colour range page.

NOTE: The Colorbond® Metallic garage doors are only available in a smooth finish and in the Flatline, Slimline or Glacier sectional door profiles.

Steel-Line has incorporated Italian design and innovation using quality BlueScope® Steel in a range of finishes never before seen in Australia. Designed with value for money and quality in mind our DecoVogue® garage door will add a whole new dimension to your home.

Features & Benefits

The DecoVogue® garage door can be adapted to many different architectural styles due to modern powder coating technology offering plain colours and decorative finishes. They are available in a choice of seven designs which are applied using a polymer based marine grade powder coating with a photo image transfer in a process exclusive to Steel-Line Garage Doors.

Made from only the best quality Australian products such as BlueScope® steel, our DecoVogue® sectional garage doors offer all the security and peace of mind that you have come to expect from a Steel-Line garage door. Proudly manufactured right here in Australia, DecoVogue® sectional garage doors are built tough enough to endure the extremes of Australia's harsh weather conditions.

For Colour options refer to the colour range page.

Using patented technology licensed from Decoral in Italy, Steel-Line's innovative range of DecoWood® sectional garage doors combines the look and feel of genuine timber with the strength and security of steel. The result is a range of sectional garage doors which gives your home the stylish look of a timber door without the price tag and extensive maintenance requirements, year after year.

Design Innovation

The DecoWood® garage door is ideal for coastal properties with its marine grade powder coating and bushfire prone areas. It is made from BlueScope® steel, which is an incredibly versatile material, preferred by builders and designers alike for its strength, durability, flexibility, lightness and corrosion-resistance. The DecoWood® garage door is very difficult to scratch, because of its hard-baked powder coating process – certainly much harder than timber. Unlike timber, DecoWood® garage doors won't warp, shrink, splinter or rot. They require little maintenance, and they are also completely impervious to termites.

DecoWood® sectional garage doors are available in a choice of 12 great timber hues, which are applied using powder coating and special polymers in a process exclusive to Steel-Line Garage Doors. Designed with value for money and quality in mind, our DecoWood® sectional garage door provides the solution that gives home owners the timber look at almost half the cost of an actual timber door.

 For Colour options refer to the colour range page.

**REALISTIC TIMBER LOOK
WITH THE STRENGTH
OF STEEL**

MATT FINISH

Slimline sectional garage door in Colorbond® Surfmist®

The Steel-Line Matt finish sectional garage door allows you to make stylish and defining design choices for your home. Choose from five of amazing Colorbond® colours: Surfmist®, Shale Grey™, Dune®, Basalt®, and Monument® to make your design statement.

To achieve this finish, these five neutral Colorbond® colours are powder coated on BlueScope's steel sheets, creating a softer, subtler look.

Why choose Steel-Line Matt finish?

- Long term durability with exceptional corrosion and dirt resistance.
- Manufactured in Australia and compliant with relevant Australian standards.
- Designed to withstand the harsh Australian environment, maintaining its Matt finish, looking even better for longer.
- Suitable from moderate to severe marine or industrial environments.
- Complementary with Colorbond® Matt roof or window frames.

For Colour options refer to the colour range page.

RENDERED FINISH

Slimline sectional garage door in Mosaic colour

Steel-Line rendered finish garage doors can be adapted to many different architectural styles using our modern powder coating technology. They are made from BlueScope steel, preferred by builders and designers alike for its strength, durability, flexibility, lightness and corrosion resistance.

Modern, stylish and luxurious.

Concrete look render is one of today's most popular choices in home design and styling. This is not only due to its pleasing aesthetic, quality and texture, but also for its strength and durability in the harsh Australian conditions.

A concrete look rendered finish garage door is a stylish and modern compliment to your home, enhancing and unifying your home's facade. When a smooth concrete look render is applied to the garage door, the finished result is modern, high end and luxurious.

For Colour options refer to the colour range page.

**TOUGH, BOLD,
MINIMALISTIC &
RUGGEDLY BEAUTIFUL**

COLORBOND® ROLLER DOORS

Our Steel-Line garage roller doors combine a unique profile with first class materials making them the strongest, quietest and most reliable doors available.

Easy to use and long lasting, Steel-Line's garage roller doors can be made to suit almost any size opening. Combine this with a range of Colorbond® colours and smooth operation, Steel-Line garage roller doors become true design features of your home.

Manufactured with heavy duty bottom rails containing durable PVC weather seals, a Steel-Line garage roller door provides your precious garage contents with excellent protection from the harsh elements including wind, rain and dust.

All Steel-Line roller doors can be automated with a quality approved automatic operator. As a market leader in safety and innovation, all Steel-Line approved operators include a range of safety and convenient features. The standard 'Auto Reverse System' causes the garage door to immediately stop and reverse when it comes into contact with an object, while the optional extra, 'Photo Eye' feature automatically reverses the closing garage door if its electronic beam senses an obstruction.

For Colour options refer to the colour range page.

COLORBOND® SECTIONAL DOORS

Ranch sectional garage door in Colorbond® Wallaby™

Enhance the exterior of your home with a garage door that will complement any style of architecture. Steel-Line has a range of garage door styles to suit the unique characteristics of your home. Choose from the stylish Heritage, Ranch, Slimline, Glacier or Flatline door styles and then select the finish of your choice to really enhance the exterior of your home.

Steel-Line's sectional garage doors have exceptional weather-resistant qualities. They are resilient against wind and dust conditions and come with heavy duty aluminium bottom rails containing PVC weather seals, so you can trust that the precious contents of your garage are protected at all times.

For Colour options refer to the colour range page.

STRONG AND QUIET HINGES

Strong and Quiet Operation

To avoid the harsh sounds of metal-on-metal, Steel-Line uses accessible hinges made from a specially designed nylon composite materials for smooth, quiet and trouble free operation.

TILT DOORS

Western Red Cedar slatted tilt door

The most prominent visual feature of your building, factory or shed is often the garage door. So it makes sense to choose our custom designed tilt garage door because it's the ideal combination of strength, security and aesthetic appeal.

Not enough room in your garage for a sectional or roller door? A lot of older garages can be quite limited in space.

Steel-Line tilt garage doors offer the perfect solution for smaller garages or spaces with restricted side or head room. Our tilt garage doors are fast-opening and easy to operate. Manufactured to fit most garage openings and easily installed, the tilt garage door offers safety, security and convenience in a wide range of colours and materials.

As tilt garage doors are predominately used in private garages on residential homes or units, factors such as ventilation, strength, security and appearance are important. In a world of choice, we have endeavoured to cover all possible needs with our diverse and innovative product range.

The choice of materials is almost as varied as your imagination allows, and commonly includes plywood and moulding, Western Red Cedar, aluminium composite panels, copper sheeting, clear or textured glass/acrylic, and many others.

For design options please contact Steel-Line.

NOTE: This door may not be available in some regions in Australia. Please check with your local Steel-Line branch regarding availability.

Biowood® garage door in Jarrah 150mm x 18mm Shiplap

Steel-Line's Biowood® garage door retains the natural timber look and feel, is low maintenance and meets the standard for fire safety under BAL-29 conditions.

There are several good reasons to choose a Biowood® garage door for your home. The Biowood® wood composite products are created using 0.85 density natural cellulose fibre from plantation harvested timber combined with a specially formulated resin. It retains the aesthetic natural look and feel of wood, is lightweight, provides a high degree of water resistance, does not bleach, split, crack, and is suitable for both bushfire regions up to BAL-29 rating and marine applications. The product is termite resistant, low maintenance and is green certified by Global Green Tag. It is the perfect durable product for all building applications.

With the Biowood® sanded finish and unique coating process, these doors are not only beautiful to look at, but are also robust, versatile and designed to withstand the harsh Australian climate.

 For Colour options refer to the colour range page.

LOUVRE DOORS

Steel-Line's aluminium Louvre sectional garage door has been developed to give a high level of airflow and natural light transmission.

Steel-Line sets a new benchmark for Louvre garage doors. Designed and manufactured in Australia, our Louvre garage door is extremely strong and secure with a modern architectural look. Its ability to provide privacy for what is inside and still allowing a minimum 22% ventilation, makes this the door of choice for many modern developments. The aluminium Louvre panels permit diffused natural light transfer into your garage whilst avoiding direct sunlight.

Steel-Line's stylish Louvre garage door can create a look that will complement the front of your home and give it more street appeal. There are numerous sizes and colours to choose from, and we can even custom built a Louvre garage door to suit your individual project needs.

Stringently tested to meet wind load requirements

Steel-Line Louvre garage doors have been engineered to the highest standard and tested at the James Cook University Cyclone Testing Station against the wind loading requirements of AS/NZS 4505-2012.

Designed for strength and safety

The wind rated Louvre garage door uses the proven Wind Brace post system developed for the standard range of wind rated Steel-Line sectional garage doors.

The Wind Brace design features a removable steel post or posts (dependant on door width) that is installed to the garage door once a cyclone warning is received. It takes about 2-5 minutes to install, and no tools are required. This feature allows the door to achieve a maximum C3 wind rating for wind region C and D in Australia.

For design options please contact Steel-Line.

WIND RATED DOORS

Wind rated Slimline sectional garage door in Colorbond® Jasper™

Superior strength and rigidity are qualities of the unique design of the Steel-Line wind rated garage doors used in high wind or cyclonic locations.

Stringently tested to meet wind load requirements

Steel-Line wind rated garage doors have been engineered to the highest standard and tested against the wind loading requirements of AS/NZS 4505-2012. The Windlock roller doors also have Northern Territory Deemed to Comply certification.

Designed for strength and safety

WIND RATED POST FREE SECTIONAL GARAGE DOORS

The new wind rated Post Free sectional doors incorporate the use of heavy duty struts, commercial style, top and bottom brackets in combination with a unique patented strut locking system that provides maximum resistance to forces exerted by cyclonic and high winds.

WIND RATED WIND BRACE SECTIONAL GARAGE DOORS

The Wind Brace* design feature with removable steel wind brace post(s) is installed to the sectional garage door once a cyclone warning is received. It takes about 2-5 minutes to install, and no tools are required. This feature can significantly enhance wind resistance up to C4 wind rating while still ensuring a smooth door operation.

WIND RATED WINDLOCK ROLLER DOORS

The Windlock roller doors are designed to provide additional reinforcement in pressure conditions caused by strong winds from extreme weather. They have been widely used for homes, sheds, commercial and industrial warehouses in high wind prone areas.

For Colour options refer to the colour range page.

* Door width above 5500mm

GREATER CONVENIENCE**

ACCESSORIES

Photo Electric Beams

The Photo Electric Beam is designed to detect an obstruction while the door is closing and to send a signal to the opener to reverse or stop the door movement. It helps to protect your family from injury and your car from the damage caused by contact.

Wireless Wall Mounted Remote

Can be installed near an internal access door to your garage giving you greater convenience to open and close your garage door.

Wireless Security Keypad

The security keypad can be programmed with up to twelve user codes. It is perfect for the family, trades people, or even just going for a walk. This means you can leave your keys at home with the peace of mind that your home is secure.

Battery Backup

The Marantec Comfort 380 is available with a battery backup that provides an energy supply in the event of a power cut.

Additional Handsets

Key ring remote transmitters are small and convenient with the ability to operate up to four doors or gates from the one unit. A must have for every set of keys in the house.

Emergency Key Release

Used in case of malfunction or power failure, especially useful if there is no other access to the garage.

Secura-Lock

Automatic garage locking system providing enhanced security and peace of mind. The Secura-Lock is compatible with Marantec sectional door openers.

Brush Seal

A tough and durable brush seal can help better protect your garage from the elements and satisfies the bushfire area standard AS3959-2009 for protecting against fire embers entering the garage.
